

Guidelines for Submission

May 2022

Publishing in this Journal

The editorial mission of *Journal of Multilingual Theories and Practices (JMTP)* is to provide rich insight into the phenomena of multilingualism and multilingual education for readers and contributors from diverse research and language communities. The disciplinary spectrum may include linguistics, applied linguistics, psychology, neuroscience, sociology, and education. Topics of interest are early bi-/tri-/multilingualism, bi-/multilingual language development, education, competencies, literacy, identity, communities, work environments, later-learned additional languages, language maintenance and attrition, etc.

Author Guidelines

There are two issues each calendar year (May and November). One of these issues may be a special thematic issue which may be guest edited. To propose a thematic issue, please contact the journal editor to discuss the project and timeframe.

Once you have decided to submit your research for publication consideration in *Journal of Multilingual Theories and Practices*, please, carefully read all of the author guidelines below:

Language of Publication: English.

Manuscript Style: See details below. Manuscripts that comply with the style requirements will assure timely movement through the editorial process. Manuscripts that deviate substantially may be rejected during the in-house reviewing process.

Manuscript Length: Articles should not normally exceed 8000 words (inclusive of notes, tables and bibliography). Short reports and summaries do not normally exceed 2000 words and book reviews not more than 1000 words. Only one book review will be published per issue.

Submission Requirements: Manuscripts should be submitted online in Word format. Full instructions and support are available on the site and a user ID and password can be obtained on the first visit. All electronic submissions must include a 200 word abstract. Authors should also list up to 5 keywords for their submission. Authors must not include their name or contact details within the document. If the manuscript includes lengthy appendices, audio or visual data, and/or transcriptions, particularly in a foreign language, you should provide the translation in English.

You will also be asked to fill in metadata for your article, but this will not be viewed by any reviewers and will not compromise blind peer-review. If you need assistance with the submission process, please contact aparkin@equinoxpub.com

Multiple Submissions for Publication Consideration in Different Venues: Manuscripts submitted simultaneously for publication in other Journals are not considered. Author(s) must inform the editor at the time of submission of similar/related versions of manuscript that have appeared or are being considered elsewhere.

Multiple Manuscript Submissions: *Journal of Multilingual Theories and Practices (JMTP)* discourages authors from submitting multiple manuscripts to the journal until the editorial board has made a decision on the first submission.

The review period normally takes 12 weeks.

Detailed Notes for Mss Preparation

Editor: **Piotr Romanowski**, University of Warsaw, Poland

For more information about *Journal of Multilingual Theories and Practices*, visit <https://journal.equinoxpub.com/index.php/JMTP>

The language of publication is English. Authors whose native language is not English are asked to have their manuscript checked by a native speaker before submission.

PDFs are not acceptable for submission of articles; however, you can upload a PDF as a Supplementary file.

Audio/video material

If there is material here that would only be appropriate for online publication, please indicate so in a note to the Editor (at Stage 1 of the submission process).

Ensuring a Blind Peer Review

All articles are reviewed preserving the anonymity of authors and reviewers. To assist in this, please take the following steps:

1. Remove your name entirely from the text. When citing your own publications, substitute the word 'author' for your own personal details and for the actual title of your work cited.
2. With Microsoft Office documents, author identification should also be removed from the properties for the file (see under File in Word), by clicking on the following, beginning with File on the main menu of the Microsoft application: File>Save As>Tools (or Options with a Mac)>Security>Remove personal information from the file properties on save>Save.
3. On any PDF uploaded, remove author names from Document Properties found under File on Adobe.

Manuscript Style Guide/Spelling & punctuation

Our default house style uses British spellings and punctuation conventions. Our house style avoids hyphens, e.g. in 'sociolinguistics', 'multicultural', 'overrepresentation', etc. Please use double hyphens to indicate page ranges, e.g. 12--47. All such double hyphens will be replaced with en dashes in production (e.g. 127–47). In the default British style, unspaced em dashes are avoided and replaced with spaced en dashes. Use single quotation marks, except where material is quoted within quotes where double quotation marks should be used. Abbreviations (e.g. 'ed.', 'Prof.') normally end with a full stop, but shortened forms (e.g. 'Mr', 'Dr') do not.

List styles

Linguistics articles often contain lists of various kinds, and sometimes, lists within lists. Please use the following guidance when numbering such lists.

- 1) use arabic numbering for lists, roman numbers for lists within lists, and lower case letters (where necessary) for lists within lists within lists.
- 2) using brackets:
 - i) You may use a closing bracket, if you wish, after the initial number.
 - ii) Never use a full stop after the number.
 - iii) Do not enclose numbers in both opening and closing brackets – reserve such bracketed numbers for numbered linguistic examples.
- 3) If you are using numbered headings do not use arabic numbers for lists. Use roman numbers, and then lower case letters.

Whatever scheme you use for number hierarchies, apply this systematically throughout the article.

References

The references list should contain all works cited in the text and only those. List them in alphabetical order by author/editor name. Do not use a long dash to indicate the same authorship as a previous entry. Repeat the author and date for each entry.

Journal article

Author, A. and Author, B. C. (YEAR). Title of article with initial capital and capitals for Proper Nouns only. *Journal Title in Italics with Main Words Taking Initial Caps*, vol.(issue), page range. <https://doi.org/10.3389/xxxxxxxxxxxxx>
Ostermann, A. C., Dowdy, J. D., Lindemann, S., Turp, J. C. and Swales, J. M. (1999). Patterns in self-reported illness experiences: letters to a TMJ support group. *Language and Communication*, 19(2), 127--147.
[https://doi.org/10.1016/S0271-5309\(98\)00011-1](https://doi.org/10.1016/S0271-5309(98)00011-1)

Book

Author, A. and Author, B. C. (date). *Title of book in italics with capitals for proper names only*. Publisher.
Shuy, R. W. (1998). *Bureaucratic language in government and business*. Georgetown University Press.

Article in edited collection

Srivastava, A. K. and Gupta, R. S. (1990). Literacy in a multilingual context. In D. P. Pattanayak (ed.), *Multilingualism in India*. (pp. 67--78). Multilingual Matters.

Electronic references

Add availability information to the reference, e.g: Durbridge, N. H. and Stratfold, M. (1997). Varying the texture: A study of art and learning. *Journal of Interactive Media in Education*, 1, 13--16. Retrieved on 10 October 1997 from <http://www-jime.open.ac.uk/jime/current.html>

Citations in your text

Use the following format for citations: Shuy (1998:57) claimed ... First citation of article with up to four authors: Ostermann, Dowdy, Lindemann and Swales (1999:231) suggest ... Subsequent citations: Ostermann et al. (1999). Citations with five or more authors: use et al. throughout. Citations in parentheses within text: (Swales 1999:231).

Never use 'ibid' or 'op. cit.' forms of reference. Every reference and citation should be freestanding.

Quotations

Quotations over 40 words in length should be given a new paragraph, using a named paragraph style. The citation (or just the page number[s], if the author and date are used to introduce the quote) should follow the final punctuation mark of the indented quotation, with no full stop after the closing parenthesis. (Shuy, 1998: 73--74)

Additional information for the Preparation of manuscripts

The following points are essential if your submission is accepted and you are preparing the manuscript for confirmed publication. However, we recommend that you follow these guidelines throughout the submission process as they are good practice.

Fonts and font styles

Use Times (or Times New Roman) 12 pt as the font for the main text. Use the following fonts, where required, for special purposes:

- concordances and transcripts should be set in courier;
- phonetics characters should be set in an IPA font (use SIL Doulos IPA93 or Charis SIL); embed the font you use in the document;
- special symbols should be set in a symbol font (as far as possible, use only one such font throughout the manuscript);
- text in a language which uses a non-roman writing system (e.g. Mandarin, Arabic) may need a special language font; -use italics to show which words need to be set in italics, NOT underlining. (This is so underlining can be used as a separate style in linguistic examples and transcripts, where needed).

Using paragraph styles

If your text requires special formatting (i.e. your article contains more than straightforward text paragraphs and headings), make sure that you use paragraph styles systematically. The general rule is that each distinctive kind of paragraph, e.g. headings, quotations, numbered examples, should be allocated its own, named, paragraph style. Apply that style systematically to every instance of that kind of paragraph and do not use it anywhere else. It does not matter much how each style looks on the page – when the article is typeset it will look different. What is important is that different kinds of paragraph are distinctively 'tagged' by means of their paragraph style. The following material should be clearly identified by using distinct paragraph styles:

- Headings. Use no more than three levels of heading below the article title or chapter heading and use a different named style for each level of heading. Headings can be numbered if required. If numbering is used, do not put a full stop at the end of the number and use a TAB to separate the number from the rest of the line.
- Quotations which are sufficiently long to require setting out as a blocked paragraph. Do not enclose such quotations in quotation marks.
- Bulleted or numbered lists. Use a different named style for each level of indentation.

- Transcript or similar paragraphs which need distinctive treatment.
- Displayed and numbered examples (use a different paragraph style for each distinctive type of line, as described below).

Displayed examples

Displayed language examples should be numbered as follows:

- (1) Frank liked Joan.
- (2) Joan always liked Frank.
- (3) Joan never liked Frank.

Where elements need to be precisely aligned on different lines, use one of the following techniques:

- set all lines in Courier and use spaces to achieve the desired alignment.
- use the table function in MSWord and align cells as needed.
- use a paragraph style in which a TAB is set every 3mm in the line, and use TABs to align material on each line.

Where displayed examples form a major feature of your article, make sure that each line requiring a distinctive typographic treatment has its own named paragraph style. For instance, you might call the style used for the first line of a numbered example, 'Example 5 1'; the style for a line beneath which needs to be set in smaller point size (e.g. a gloss), could be called Example 2; and a third line which gives a translation, Example 3.

Tree diagrams

Any tree diagrams should be treated as displayed examples and numbered in the same sequence. They should be prepared as finished artwork, ready for reproduction. Do not use any specialised software for creating trees which requires the use of special software or fonts in the publisher's production department.

Transcript data

Transcript data should be set in a Courier typeface. Wherever possible, transcript data should be numbered by turns rather than lines so that linebreaks can be reformatted during pagination. Where linebreaks need to be maintained, or lines need to be numbered individually, the length of each line, including line number and any speaker names, should not exceed 65 characters. Where elements need to be aligned with others on lines above or below use multiple spaces to produce alignment (transcript data MUST be set in Courier for this to work). Ensure that you have punctuated any transcripts in a consistent way. Transcript data will not be subject to copyediting and will be reproduced exactly as submitted insofar as the need for consistent page layout allows.

Preparing tables

Tables should be included in the manuscript at the point at which they are needed. A caption should be placed before each table. Do not use background tints in cells. Ensure that a table will fit into the final text width (around 114mm) without the font size falling below 9pt. Avoid vertical rules in tables. Minimal horizontal rules will be applied during production to bring tables into house style.

Figures and artwork

Figures should never be supplied as, or embedded in, MS Word files. All figures must be supplied separately in digital form, a single figure per file. The name of the file should reflect the figure number (e.g. Figure 3.1 should be found in a file called something like 3.1.pdf). Artwork files should contain no captions or material other than the figure itself. 6 At the point where a figure should appear in the text, on a separate line write [FIGURE 3.1 NEAR HERE]. On the line after this, include the caption. Ensure that the caption is placed in the manuscript and NOT in the artwork file. Figure numbers should include the chapter number e.g. Figure 1.4, Figure 8.2. See the fuller, detailed guidance on preparing artwork (below) if figures are a prominent feature of the article.

Tables containing artwork

If your article contains tables which contain artwork within cells, please include such tables in place in the ms (like any other table) but also supply a PDF as a separate file (i.e. treat also as artwork).

Endnotes

Number your notes consecutively, starting with 1, and place note references outside punctuation. There are **no footnotes** in Equinox linguistics journals.

Permissions and copyright

It is your responsibility as author to ensure that you have obtained permission to reproduce any part of another work. If your article contains extracts from other works, especially figures, tables, poetry etc., please contact the authors and publishers BEFORE submitting the final version to seek permission to use their work. If *primary research data* is to be included, research participants should have signed a consent form.

Guidelines for the Preparation of Artwork

All authors are expected to supply 'camera-ready' art work with their manuscripts. These notes explain what that means in practice, and gives guidance as to how to prepare the most common kinds of artwork needed in linguistics publications. Supplying the right kind of artwork is critical to the timely production of a book or issue of a journal.

Where problems arise in production it can hold up the production of a title substantially – sometimes by many months – as the manuscript may need to be put to one side whilst problems are resolved, and another title fills its 'production slot'. Preparing the right kind of artwork is also often critical to the financial viability of a book or journal. It is very costly in studio time to draw up, or repair, even simple linguistic diagrams and since few graphic artists are linguistics specialists, there are often time-consuming and expensive corrections to be made.

Please be aware that when you submit the final draft of your manuscript to the Publisher you are confirming that the artwork (photographs, line drawings, tables and data examples) are ready for publication. Although you will be given an opportunity to check proofs of your work, this is intended only to ensure that nothing untoward has occurred in the production process. For the majority of artwork, no changes will be possible at proof stage.

All figures must be supplied separately from the manuscript, in an appropriate digital format. Each figure will be reproduced exactly as you have created it. We will scale down the artwork, if necessary, to fit the page dimensions. Artwork which is wider than the width of the text column in the printed page will in most cases be scaled to 114mm. This will reduce the size of any text in the artwork and you should take this into account when creating it.

There are two main kinds of digital artwork used in publications: vector and bitmap. This section provides advice as to when each format is most appropriate and guidance as to what to do and what to avoid when preparing your artwork.

Artwork usually appears in colour in the online version and b/w in the print version and you must make sure that any tints used (e.g. in graphs or bar charts) are sufficiently distinct. Do not use tints below 20% or above 80% and ensure that any tints used differ by at least 20%.

Do not embed any artwork in the Word files containing the manuscript or supply artwork in Word format. Any such artwork will be lost in the conversion process.

Each figure must be supplied as a separate file in PDF, ai (Illustrator), eps (Encapsulated Postscript), Tiff, or Jpeg format. Jpeg should be used only for photographs and should be compressed with a 'High Quality' setting.

Each artwork file should be named according to its figure number. Where a piece of unnumbered artwork is needed, name the file using roman numerals (e.g. Figure v) and use this number when showing where the figure is to appear in the manuscript (see below). All photographs should be supplied at a resolution which will allow reproduction at 300 dpi at the final size.

Do not use 'screen grabs' to create artwork except for illustrations of what a screen looks like (e.g. in research on the use of computers in classrooms). The resolution of a screen shot is typically 72 dpi and is too low for normal reproduction in print.

Where possible avoid bitmap format for figures containing text or lines. Where such a figure must be submitted in bitmap format (e.g. because it has been scanned from another work), it should be supplied at at least 600 dpi in TIFF format. Never use jpeg format for figures containing lines and/or text. 8 Never use drop shadow effects on artwork. Ensure the background to the artwork is white or transparent. Do not enclose the artwork in a frame or tinted box. Make sure any lines are at least 0.5 pt in width.

The same rules apply to fonts in artwork as those relating to the manuscript. Where possible use only standard fonts (e.g. Times, Arial, Helvetica, or Courier). Use specialist fonts (e.g. Chinese, IPA) only where absolutely necessary. Where you supply files in PDF format, make sure that all fonts are embedded.

How to show placement of artwork in the manuscript

Show where a figure should appear in the main text by inserting a line as below:

[FIGURE 1 NEAR HERE]

Use square brackets as shown. If there is a caption, this should NOT be included in the artwork file but MUST be included in the main text file immediately under the line showing the insertion point. If the artwork is an unnumbered figure use a temporary roman number (e.g. Figure v) and do not include a caption. Make sure that, whatever you call it, the name of the file containing the artwork is the same as what you put in the square brackets.

Using vector drawing software to create artwork

Any artwork which involves lines and text should be created using a 'vector' drawing package. There are many such packages which can create artwork suitable for publication ranging from the free (Open Office Draw) to expensive industry standards (Corel Draw, Macromedia Freehand, Adobe Illustrator). If you have an option to set the 'colour mode' of the figure, select 'Greyscale' (if available) or 'CMYK', if not. If you choose CMYK, make sure that you use no colours other than black or shades of grey. When you save or export your file, use one of the following formats (in order of preference) PDF, ai (Illustrator), eps.

Using Microsoft Word/Powerpoint to create artwork

Many authors use the drawing facilities in Microsoft Word or Powerpoint to create artwork. This is probably the single greatest cause of headaches in production since it is very difficult to extract artwork embedded in Word files and convert it successfully into a form which can be used in book and journal printing.

Here are some of the problems:

Microsoft Office creates artwork in RGB colour – suitable for displaying on a screen. When this is converted to greyscale in production, it may not look the same as the author intended. Key contrasts (eg in the colour of lines on graphs) may be lost.

Microsoft Word documents look different on different computers. Fonts are mysteriously substituted; line lengths and breaks – even page breaks – change as text reflows on a different machine; the boundaries of areas using hatches or tints in artwork ('clipping masks') may be lost.

Nevertheless, it is often possible to create usable artwork using 9 drawing tools in Microsoft Word or Powerpoint provided that you convert the artwork file to PDF on the same machine as you created the drawing, ensuring that all fonts are embedded in the PDF. Make sure that you use no colour – only use black and tints of grey. The PDF file you send us will still be in RGB, but we may be able to convert it successfully.

If you are using Word or Powerpoint to create artwork be very careful to follow the guidance about colour, tints, fonts etc given earlier. Do not include any text which does not form an integral part of the figure (e.g. a caption or running head) in the artwork file.

Using 'Systemic Coder' to create network diagrams

Some linguists publishing with Equinox use Systemic Coder – software designed to analyse texts within the Systemic Functional Grammar framework – to generate system network diagrams. Systemic Coder can create vector artwork suitable for publication, but you may have to export to .pdx format and use a third-party program called Mayura Draw to convert this to PDF. You may also be able to create usable files by 'Save PS' option within Systemic Coder. (Please send us a sample file before submission of your manuscript if you wish to try this). Never attempt to capture the screen representation of a system network as a bitmap – the resolution of the image will be too low for printing.

Using Praat to create spectrograms etc

When preparing figures created in Praat, make sure you use the 'save' function which saves the figure as a vector eps file. Do NOT use a screen shot or screen grab which will create a large file unsuitable for reproduction.

Praat creates eps files without a 'tiff preview' .That means that, unless you have software which can load and view eps files, you may not be able to see what is inside each eps file, to check it is exactly what you want. The best way of dealing with this is to convert the eps files to PDF using the full version of Adobe Acrobat (NOT the free Adobe Reader). Sending the figures already converted to PDF is also more helpful for us.

Tree diagrams

Tree diagrams can be created using any vector graphics package (see above). Do not use any specialised software for creating trees which requires the use of special fonts in the publisher's production department. Use a Times or Times New Roman font for any text. Any tree diagrams should normally be treated as displayed examples and numbered in the same sequence. They should be prepared as finished artwork (one diagram per file), ready for reproduction in the same way as other figures. They should never be embedded in the file containing your manuscript.

--
